

Jira Backlog and Sprint Summary

Digital Loan Application and Approval System | Portfolio case study

Delivery overview

The Jira board contains eight Epics, 12 User Stories, three planned Sprints, and 24 implementation Sub-tasks. All work items are currently in To Do so the board remains a clean planning baseline.

Epics	User Stories	Sprints	Story Points	Sub-tasks
8	12	3	64	24

Sprint plan

Sprint	Goal	Stories	Points	Sub-tasks
Sprint 1	Applicant intake, validation, and document readiness	US-01 to US-04	18	8
Sprint 2	Review workflow and loan decisions	US-05 to US-08	23	8
Sprint 3	Exceptions, notifications, audit, and KPI reporting	US-09 to US-12	23	8

Epic structure

Applicant Intake	Application Validation
Document Readiness	Review Workflow
Decisioning	Notifications
Audit History	Operational Reporting

Sprint 1 backlog

All work items are planned in Jira with status To Do.

ID	User story	Epic	Priority	Points	Sub-tasks
US-01	Create loan application	Applicant Intake	High	5	- Design loan application form - Save draft and generate application ID
US-02	Submit loan application	Applicant Intake	High	5	- Validate required fields before submission - Update application status to Submitted
US-03	Validate mandatory application fields	Application Validation	High	3	- Define mandatory field validation rules - Display validation error messages
US-04	View required documents	Document Readiness	High	5	- Create required-document checklist - Show document completion status

Sprint outcome

A complete application intake flow with draft, submission validation, and document visibility.

Sprint 2 backlog

All work items are planned in Jira with status To Do.

ID	User story	Epic	Priority	Points	Sub-tasks
US-05	Request missing information	Document Readiness	High	5	- Define missing information request categories - Update status and notify applicant
US-06	Assign applications to loan officers	Review Workflow	High	5	- Build assign and reassign control - Record assignment history
US-07	View assigned review queue	Review Workflow	High	5	- Display assigned application queue - Sort queue by aging and submission date
US-08	Record loan decision	Decisioning	High	8	- Create decision and reason form - Record decision date and audit event

Sprint outcome

An operational review process with ownership, queues, missing-information requests, and recorded decisions.

Sprint 3 backlog

All work items are planned in Jira with status To Do.

ID	User story	Epic	Priority	Points	Sub-tasks
US-09	Review application exceptions	Decisioning	Medium	5	- Define aging threshold for exceptions - Display exception list with application details
US-10	Notify applicants of status updates	Notifications	Medium	5	- Create status notification templates - Record notification date and status
US-11	View application audit history	Audit History	Medium	5	- Capture status, assignment, and decision changes - Display application history for authorized users
US-12	View operational KPI reporting	Operational Reporting	Medium	8	- Calculate volume, status, and aging metrics - Display KPI reporting dashboard

Sprint outcome

Operational controls and visibility through exceptions, applicant notifications, audit history, and KPI reporting.
