Professional: Analytical Thinking, Problem Solving, Communication, Documentation, Collaboration, Attention to Detail

PROJECT EXPERIENCE

Meal Subscription Management System

Business Analysis and Data Analytics Portfolio Project | Agile, Scrum, Jira, SQL, Excel, Power BI | In Progress

- Analyzed a simulated healthy-meal subscription operation with 1,019 customer records, 650 subscription records, 2,500 orders, payments, and deliveries to identify workflow, data, and reporting gaps.
- Produced a Business Case and Business Requirements Document covering 10 business requirements, 16 functional requirements, 8 non-functional requirements, business rules, stakeholder needs, dependencies, and acceptance criteria.
- Mapped As-Is and To-Be cross-functional processes and defined duplicate validation, customer ID generation, subscription lifecycle controls, order generation, delivery status tracking, and KPI refresh processes.
- Designed a Jira backlog with 7 epics, 16 user stories, 14 subtasks, 3 planned sprints, and 83 story points, linking requirements to user stories and acceptance criteria.
- Cleaned and validated project data using SQL and Excel, removing 31 duplicate customer rows and applying date validation, category standardization, and documented data-quality checks.
- Developed 11 SQL business analyses and Power BI reporting with 78,300 JOD paid revenue, 16.92% cancellation rate, 81.82% delivery success rate, and average delivery delay KPIs.
